

Sunrise Industries B.V. – Contract grinder of Silicon

Silicon grinding experience

Sunrise Industries has been contract grinding Silicon for over 40 years. Thanks to our long and extensive experience, we are able to deliver a top quality product in terms of **optimal particle size distribution**, with **minimal milling loss and minimal fines**.

We can crush Silicon lumps of 0-100 mm and can grind material of 0-20 mm down to sizes of:

1. 400 to 1.000 μ
2. 45 to 75 μ

Certificates

To ensure maximum service and quality, Sunrise Industries B.V. obtained the following certificates:

1. ISO 9001
2. ISO 14001

Silicon grinding safety measures

In our factory we operate 5 dedicated Silicon mills. Each mill is **inertised**. All machinery we work with is **ATEX proof**, thereby preventing Silicon dust explosions.

Raw and processed Silicon is stored separately in our warehouses, eliminating the risk of cross contamination. To ensure every processed quantity complies to our given quality standards, samples of each produced ton are taken and tested in our **own laboratory**.

Silicon Packaging & Logistics

We can receive raw Silicon both in bulk and big bags. Ground silicon can be packed in:

3. Silotruck of 25-30 tons
4. Big bag 1.000 – 2.000 kgs
5. Paper bag 25 kgs
6. Metal drums

We have 20.000 m² warehousing space available for storage of raw and finished goods, including Custom-bonded entrepot C. For silo truck dispatch we have **4 dedicated silo's**. Our service includes inbound & outbound logistics and document handling.

Location and Contact

Our factory is located in the Port of Rotterdam, with good logistical connections to receive raw silicon from origins around the world and enabling dispatch to destinations throughout Europe. We can handle ships with a draft up to 6,5 meters at our own quay. Railway, highway and airport are all within 10 kilometers reach.

If you are looking for a strong, high quality and customer focused Silicon grinder in Europe, please do not hesitate to contact us.
